

1. The 412660 is used to set the correct distance from the S/120 receiver to a Keysight E8404A VXI chassis. When mounting a 12004-01 S/120 receiver to a E8404A chassis with a 10701-05 flange kit the 412660 are screwed into slots 1 and 13. Once the opposite end of 412660 touches the extrusion of the chassis the flanges can be tightened in place.
