## **Statement on Restriction of Hazardous Substances (RoHS) Directive Update: October 30, 2019**

To our customers:

MAC Panel is committed to being an environmentally responsible Company. Our support of the RoHS directive is part of our overall plan to meet or exceed regulatory requirements for the handling, recycling and the reduction of hazardous materials in our products. It is important that our employees, customers and suppliers know MAC Panel continues its strong commitment to protecting and improving the environment for future generations.

The European Union Restriction of Hazardous Substances (RoHS) Directive 2015/863/EU restricts the use of ten substances in electrical and electronic products:

Lead (Pb),  
Mercury (Hg),  
Cadmium (CD),  
Hexavalent Chromium (CR VL)  
Polybrominated Biphenyl (PBB)  
Polybrominated Diphenyl Ether (PBDE) Category 9 will apply from 22 July 2021.  
Bis (2-ethylhexyl) phthalate (DEHP)  
Butyl benzyl phthalate (BBP)  
Dibutyl phthalate (DBP)

MAC Panel is continuously working with our supply chain partners to ensure compliance to restricted material requirements of all products and materials supplied by partners.

In cases where customers require parts which are not RoHS compliant, manufacturing and storage of these components are segregated to prevent contamination of RoHS compliant parts.

Regards,  
John White  
Quality Manager  
MAC Panel Company
